FINAL EVALUATION

FINAL PORTFOLIO, STRATEGY PRESENTATION,AND REFLECTION REPORT

Paper Trading Project :

S.Padma Jothi,

II B.Com (Honours),

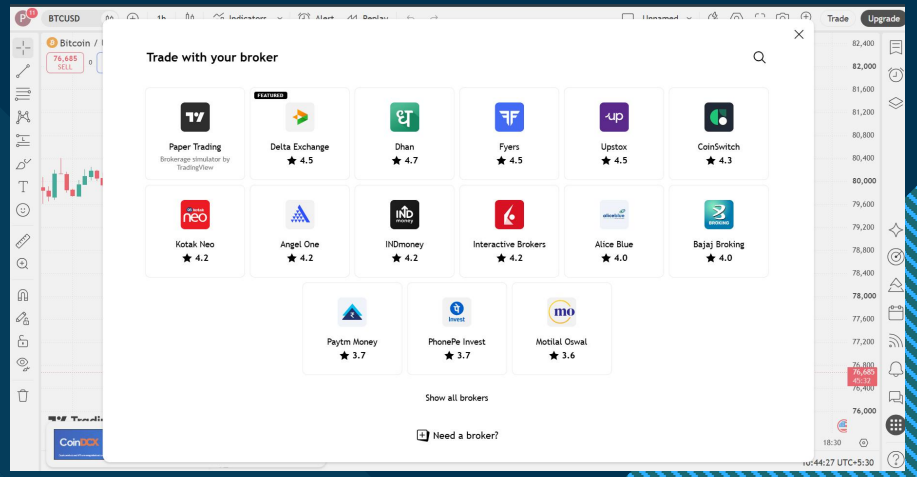

Kamaraj College,

Trading Platform : Trading View Paper Trading,

Trading Period : 9 July 2026 – 2October 2026,

Date Of Submission:

Introduction

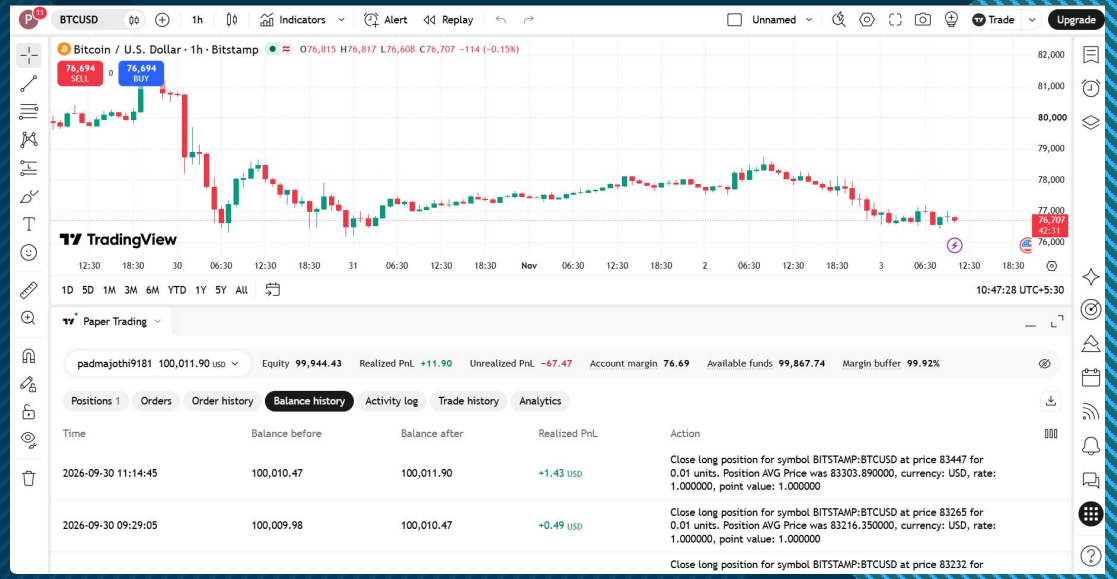

Paper trading helped me learn trading without using real money. I used TradingView Paper Trading to practise buying and selling cryptocurrencies. During this programmed, I traded mainly Bitcoin (BTCUSD) and Ethereum (ETHUSD). This report explains my trading performance, strategy, strengths, mistakes, and the lessons I learned throughout the programmed.

PORTFOLIO SNAPSHOT

Portfolio Summary	Final Result
Initial Balance	$100,000
Current Balance	$100,011.90
Equity	$99,956.63
Realized P&L	+$11.90
Unrealized P&L	-$55.27
Open Positions	1
Main Assets	BTCUSD and ETHUSD
Primary Strategy	Combined Strategy
Timeframe	1 Hour

Assets: BTCUSD
Trading Positions: LONG and SHORT

The portfolio finished with a positive realized profit while one BTCUSD trade remained open.

OVERALL PORTFOLIO PERFORMANCE

I started my paper trading journey with $100,000. At the latest stage of the programmed, my account balance reached $100,011.90.

- **Performance Calculation**
- Initial Balance = $100,000
- Current Balance = $100,011.90
- Realized Profit = $11.90
- Percentage Return = 0.012% (approximately)

Performance Analysis

My trading result became positive because I earned profits from several successful trades. However, I also experienced losing trades and one open position with an unrealized loss. This showed me that trading success depends on good decision-making, not only on winning trades.

FACTORS INFLUENCING PERFORMANCE PROCESS VS OUTCOME

Factors Influencing Performance

❑ Market Movements	BTCUSD and ETHUSD price changes affected every trade.
❑ Entry Decisions	Better entries gave higher profits.
❑ Technical Indicators	SMA and RSI helped identify trends.
❑ Risk Management	Stop-loss was not used consistently.
❑ Timing	Entry timing influenced trade results.

Process vs Outcome

❑ Checked price movement before trading	Helped improve decisions.
❑ Used indicators for confirmation	Improved confidence.
❑ Missed confirmation in some trades	Led to unnecessary losses.
❑ Followed strategy more carefully later	Overall realized profit became positive.

STRATEGY OVERVIEW

Strategy Component	Description
Market	Cryptocurrency
Assets	BTCUSD and ETHUSD
Trading Direction	LONG and SHORT
Timeframe	1 Hour
Indicators	SMA and RSI 14
Other Tools	Support and Resistance
Entry Condition	Price expected to move in my direction
Confirmation	Price movement and indicators
Exit Condition	Profit target or market change
Stop-Loss	Used when possible

Rationale for the Strategy

Why I Selected This Strategy

I selected the Combined Strategy for three main reasons.

- To understand market trends.
- To confirm trades using multiple indicators.
- To improve entry and exit decisions.

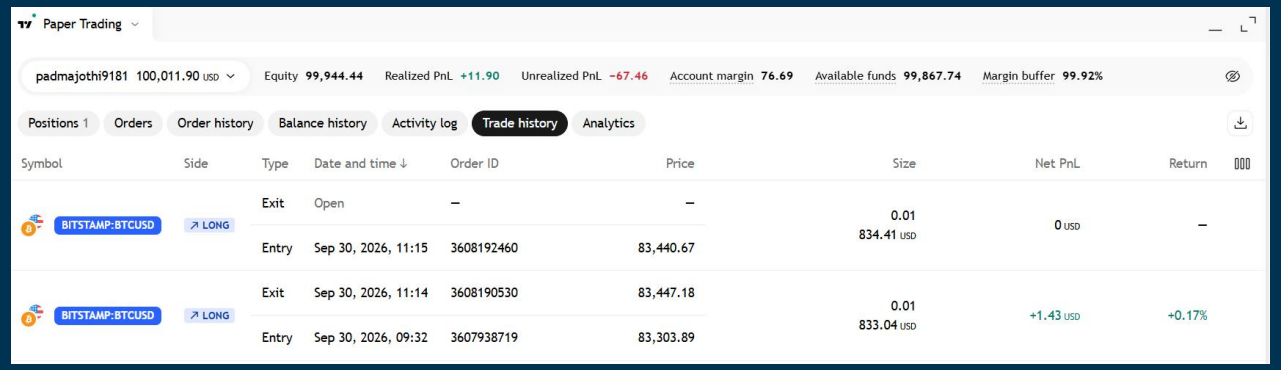

Application of the Strategy

Before entering a trade, I observed price movement, SMA, RSI, and Support and Resistance. I traded mostly on the 1-hour timeframe. During the programmed, I realized that following the strategy consistently gives better results than making quick decisions without confirmation.

REPRESENTATIVE TRADE 1: EFFECTIVE STRATEGY APPLICATION

Successful Trade

Particular	Details
Asset	BTCUSD
Trade Type	LONG
Entry Date	9 Jul 2026
Entry Price	$61,882.54
Exit Date	10 Jul 2026
Exit Price	$63,941.71
Profit	+$20.59
Return	+3.33%

Trade Explanation

I entered a LONG position because I expected Bitcoin to increase. The price moved upward as expected, and I closed the trade with a good profit.

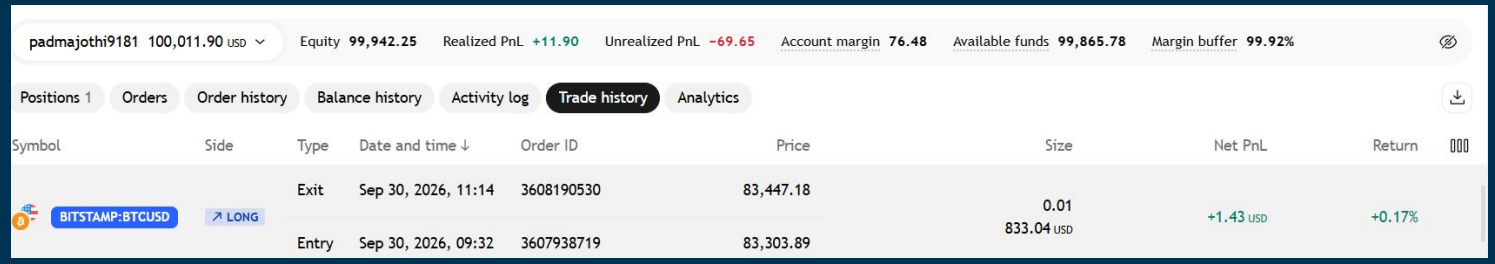

Learning

This trade showed that waiting for confirmation before entering can improve trading performance.

REPRESENTATIVE TRADE 2: IMPROVEMENT OPPORTUNITY

Improvement Opportunity

Particular	Details
Asset	BTCUSD
Trade Type	LONG
Entry Date	22 Jul 2026
Entry Price	$66,188.24
Exit Date	6 Aug 2026
Exit Price	$64,640.84
Loss	-$15.47
Return	-2.34%

Trade Explanation

The market moved against my LONG position, which resulted in a loss.

Learning

I learned that waiting for stronger confirmation and using proper stop-loss can reduce losses.

STRATEGY CONSISTENCY & TRADING DISCIPLINE

Strategy Consistency

- During the programmed, I followed my Combined Strategy in most trades. However, some trades were entered without complete confirmation.
- Towards the later part of the programmed, I became more careful about checking price movements before entering.

Trading Discipline

- Planned trades using indicators.
- Waited for better market confirmation.
- Practiced both LONG and SHORT trades.
- Improved patience.
- Became more aware of trading risks.

Overall Strengths

Understanding Market Movements

I became better at observing Bitcoin and Ethereum price movements.

Using Technical Indicators

I practiced using:

- SMA
- RSI 14
- Support and Resistance

These indicators helped me make better trading decisions.

Learning from Experience

Every winning and losing trade helped me improve my practical knowledge.

Areas for Improvement

Market Analysis

- Sometimes I entered trades too early.
- Improvement: Wait for stronger confirmation.

Risk Management

- Stop-loss was not used consistently.
- Improvement: Place stop-loss before every trade.

Entry Timing

- Better timing can reduce unnecessary losses.
- Improvement: Analyze trends more carefully.

Improvement Across the Programme

Earlier Stage

- Learning indicators.
- Less confidence.
- More mistakes in entry timing.

Later Stage

- Better market observation.
- More confidence.
- Improved trading discipline.
- Better understanding of risk.

Key Performance Patterns

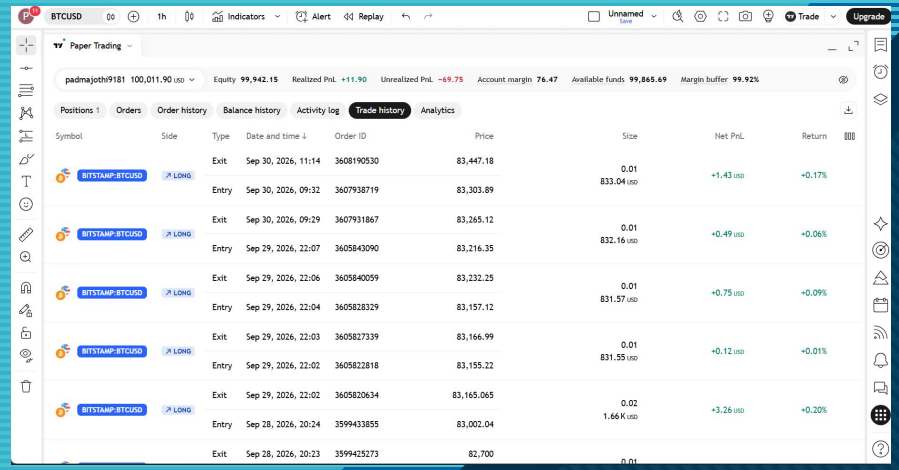

- Both profits and losses occurred.
- Profitable trades rewarded patience.
- Losing trades highlighted the importance of confirmation.

Overall Evaluation

- My paper trading experience was practical and educational. I learned how cryptocurrency markets behave and how technical indicators can support decision-making.
- Although I experienced losses, I finished with a positive realized profit of $11.90, which shows improvement in my trading approach.
- The programmed also taught me that consistency is more important than taking unnecessary trades.

Supporting Portfolio Evidence

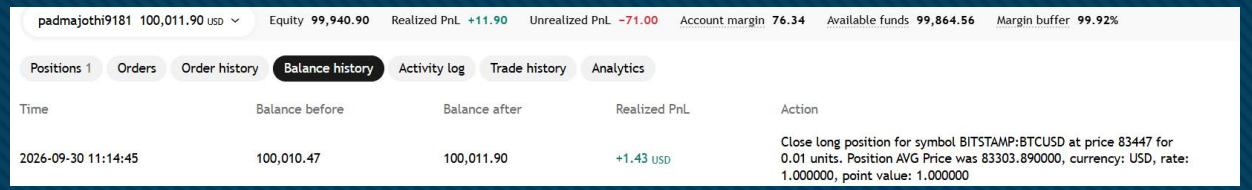

The following screenshots support my trading activities.

- Trading View Account Overview
- Trade History
- BTCUSD Chart
- BTCUSD Profitable Trade
- BTCUSD Losing Trade
- Open Position Screenshot

These screenshots provide evidence of my practical trading experience.

Conclusion

The Trading View Paper Trading programmed provided me with valuable practical experience in cryptocurrency trading. I learned to analyze market movements, use technical indicators, and make better trading decisions. Both profits and losses taught me the importance of patience, consistency, and risk management. This experience improved my analytical skills and helped me understand the value of disciplined trading and continuous learning.
